The U.S. Army and the Department of Defense's Chief Digital and Artificial Intelligence Office (CDAO) have unveiled significant advances in information infrastructure that will increase frequency of data updates, while simultaneously ensuring accuracy and improving accountability. The two organizations revealed details for two real-time, streaming, data replication pipelines from two of the Army's major Enterprise Reporting Programs (ERPs) – the Army General Fund Enterprise Business System (GFEBs) and Global Combat Support System (GCSS-Army) – into the DoD's centralized data and analytics platforms known as ADVANA.
